```
if {u == true or s == true or t == true}  
    print ("Come and join USThing!")
```

### What is USThing?

USThing is a student-developed, all-in-one mobile app that was established in 2014. Available in both Android and iOS systems, the app aims to boost students' campus experience by making access to University's IT resources easy. Several new features are on their way and are looking for your participation.

### Who works in USThing?

USThing is a team supported by some of the most passionate and talented students in UST. With diverse majors, years, and backgrounds, the team shares a common goal and works towards the continual betterment of the app and the HKUST student community.

## **Job Highlight & Requirements:**

We are now glad to open applications for the following job roles:
